CERTIFICATE OF INDEPENDENT BID DETERMINATION

SBD 9

1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.

- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
- a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

THE RESEARCH AND DEVELOPMENT OF A SUSTAINABILITY MODEL FOR COMMUNITY & SMALL COMMERCIAL MEDIA

1. INVITATION TO PROSPECTIVE RESEARCH SERVICE PROVIDERS/BIDDERS

- 1.1 The Media Development and Diversity Agency invites potential service providers (bidders) to submit proposals to conduct research and develop a sustainability model for the community and small commercial media sectors.

2. BACKGROUND AND RATIONALE

- 2.1 In 1994, South Africa emerged from the apartheid government system with a highly monopolised media industry, characterised by very limited diversity of news and/or opinion as well as the suppression of the voice of Black people. The new democratic South Africa that emerged recognised the urgent and critical need for the transformation of the media environment based on the key principles of freedom of expression, the development of the media diversity in conceptualizing the role of the media in a democratic state, and universal access to information, as the cornerstones of our democracy.
- 2.2 The MDDA was established through the MDDA Act of 2002 to facilitate ownership, control and access to information and content production of the community media by historically disadvantaged communities. The entity has been at the forefront of pioneering community media development and the transformation of the mass media in South Africa. The MDDA is funded through annual government grants and mainly from the commercial broadcasters' universal service and access fund (USAF) levies, imposed on them. In the past 17 years, the entity has funded about 160 community broadcasters (including four televisions), as well as 33 community print and 45 small commercial print media.
- 2.3 Besides its many other benefits, the community media's overwhelmingly unique selling point is that it deals with issues that are not adequately addressed by the commercial media. However, despite its more than 20 years of existence and considerable growth, the community media sector is still not perceived as the authentic source of local content and as the platforms to reach the often-inaccessible audiences. This means that the community media platforms have not yet been able to convince advertisers of their value for advertising - the lifeline for the community media's sustainability in the long term.
- 2.4 Over time and despite the MDDA's interventions and support, the sector is not sustainable. The community and small commercial media sectors continue to face a myriad of challenges. Over the years, and, in order to fully understand these challenges, the Department of Communications and/or Ministry in The Presidency hosted a number of community media engagements through summits, colloquiums, visits to community radio stations/print projects - to explore new and

innovative solutions for the short, medium and long-term, towards the sectors' sustainability.

- 2.5 Indigenous languages the world over are under threat of disappearing completely if nothing is done. Community media are an important way that these languages can be preserved, raising the prestige of a people's heritage, language, and instilling pride in younger generations by solidifying the fact that their language is relevant, living, and useful.
- 2.6 Furthermore, the fragile sustainability of the community media sector is posing a threat to its very survival, potentially reversing the gains made by the democratic South Africa in ensuring all its citizens have a 'voice' through access and/or control of the media. Such access underpins one of the most important principles in South Africa's Constitution, that of freedom of expression. The MDDA therefore has a critical role to play going forward to 'future-proof' this sector, both through financial and non-financial support such as capacity building and skills creation.

3. RESEARCH OBJECTIVES

- 3.1 The main objective of the sustainability research is to develop a South African Sustainability Model for the Community and Small Commercial Media, which must categorise the sector according to their ability to self-sustain, partially sustain; and inability to self-sustain for focused, responsive and proactive support. This should take into account:
 - 3.1.1 United Nations Educational, Scientific and Cultural Organisation (UNESCO) defined Media Viability Indicators to gain a better understanding of the root causes for lack of sustainability by the community and small commercial sectors; build on its strengths and develop sustainability strategies.
 - 3.1.2 Propose alternative donor revenue streams beyond government funding.
 - 3.1.3 Identifying research gaps (e.g. missing variables) that can contribute to building a sectoral sustainability model.
 - 3.1.4 Identifying opportunities to secure funding and/or support from other sectors that have not been considered before, i.e. international donors, private sector and other related government departments like Small Business, Department of Trade, and Industry, etc.
 - 3.1.5 Propose alternative revenue streams and the tools and mechanisms required to access those alternative revenue streams, beyond government and donor funding, which may assist the South African Community and Small Commercial Media (CSCM) to achieve long term sustainability. Understanding and identifying economic activities in the communities where the sectors operate and the relationship these have with the sector.
 - 3.1.6 Building innovative and digital skills and capacity that will assist the sector embrace and prioritise the use of digital technologies to leverage data analytics, revenue generation and other benefits.
 - 3.1.7 Establishing how entrenched and inclusive the community and small commercial sector are, in the communities they serve.

4. THE RESEARCH QUESTIONS

- 4.1 The key questions to be answered through this research include, but are not limited to the following:
- 4.1.1 What are the current levels of organizational capacity among South African Community and Small Commercial Media (CSCM) that may influence the achievement of sustainability?
 - 4.1.2 What underlying factors influence the sustainability and the unsustainability of the CSCM sector?
 - 4.1.3 What are the available opportunities/resources that could be leveraged to strengthen sustainability of CSCM organisations within and beyond their communities?
 - 4.1.4 What are the trends in ownership and control of CSCM organisations and how might this influence sustainability within the sector?
 - 4.1.5 What is the minimum viable economic model for achieving sustainable self-sufficient CSCM organisations?

5. THE SCOPE

- 5.1 The appointed service provider is expected to answer the above research questions using sound methods which may include use of both primary and secondary data. It is expected that the research will engage in data collection from a sample of the CSCM organizations supported and not supported by MDDA, along with any relevant stakeholders that the service provider may propose as needed to answer the different questions. The sample of the database which will be provided by the MDDA is as follows:

- 5.1.1 72 broadcast services inclusive of all community tv stations
- 5.1.2 30 small commercial and community print publications.

In line with 5.1.1 and 5.1.2 above, the service provider must ensure that the sample is representative of the nine (9) South African Provinces

- 5.2 The appointed Service Provider will be provided with reports, action plans and findings from previous research studies, summits, colloquiums and relevant engagements for analysis and extraction of relevant variables that significantly contribute to the sustainability research which will be used to develop a sector sustainability model.
- 5.3 The service provider will also be provided with the presentations and reports that emanate from past sector engagements. The aim of the consultative conference was to agree on focus areas or terms for the research on each of the identified sustainability challenges which informed the commissions for the conference.
- 5.4 The research will also include a review of literature on existing CSCM sustainability models used in other countries from which South Africa can learn from.
- 5.5 Furthermore, the service provider will be expected to conduct a legislative analysis of the sector to assess the extent to which legislation may be contributing to the sustainability or to the lack of sustainability within the sector.
- 5.6 The research is expected to include an economic analysis that will result in developing the minimum

viable economic model, sustainability model and tools for achieving sustainability among CSCM organisations.

6. THE ROLE OF THE MDDA

6.1 The MDDA Research Committee and Executive will:

- 6.1.1 provide strategic leadership and guidance to the research and identify the priorities within it.
- 6.1.2 work directly with the Research Team to draw conclusions, and recommendations for the research.
- 6.1.3 engage with other relevant institutions and initiatives to secure cooperation and provision of evidence for analysis.
- 6.1.4 periodically raise awareness of the study and its findings within the sector and government; and
- 6.1.5 Oversee the delivery of the draft report for consideration by the MDDA Research Committee and a final report to the MDDA Board.

7. PROJECT OUTLINE

- 7.1 The successful service provider will be properly briefed at the beginning and throughout the research process. MDDA research team will arrange and lead a one-day briefing session where all source documents will be provided and discussed.
- 7.2 Quarterly feedback reports regarding progress and management of the project.
- 7.3 Any information and/or insight that might emerge from the process in order to contribute to an on-going process of improving the quality and usability of the findings.
- 7.4 The project closure report presented to the MDDA by not later than the date agreed to in the Service Level Agreement in an agreed format.

8. PROJECT PLAN

- 8.1 Potential service providers will be expected to develop a final project plan after the briefing session. A requirement for submission is an example of a plan taking into consideration processes/phases entailed in a scoping project. Additional requirements other than what is indicated in this document must be reflected in the detailed proposal (including a quotation) to be submitted for evaluation. **All service providers should note that the envisaged completion date of this project is a year upon appointment.**
- 8.2 The successful service provider will sign a Service Level Agreement which all parties involved will be expected to adhere to. The proposals including quotations submitted by the bidding companies will also serve as binding contracts [subject to amendments and qualifications on the latter] between the MDDA and the service provider. **MDDA reserves the right to terminate the contract if the agreed and negotiated timelines and terms are not adhered to.**
- 8.3 A need for project management skills and putting resources together towards the intended goal are important. In addition, the tasks of the successful bidder will include all stages of scoping –

i.e. understanding of existing evidence, extracting relevant variables, and identifying gaps and uncertainties, coordinating meetings, and driving each milestone of the project. The objectives of the project must drive the implementation process and delivery of the project.

9. OUTSOURCING/SUB-CONTRACTING OF THE SERVICE

- 9.1 The service provider should inform the MDDA timeously about outsourcing any aspect of the work to be undertaken if this was not indicated in the initial quotation. Outsourcing of any aspect of the task should be approved by the MDDA and costs will be covered by the service provider and not the MDDA.

10. SUBMISSION REQUIREMENTS AND DEADLINES
